SUMMARY REPORT
FT 930-E

July 1966

FOR RELEASE
September 20, 1966

EXPORT TRADE BY COMMODITY

UNIVERSITY OF FLORIDA LIBRARIES
FEB 1967
DOCUMENTS DEPT.

The Bureau of the Census, Department of Commerce, reported today that the decrease in U.S. exports of domestic merchandise, unadjusted for seasonal change,[1] from $2,531.1 million in June to $2,397.4 million in July[2] reflected decreases in exports of 8 of the 10 Schedule B commodity sections. Individual sections showing sizable decreases were machinery and transport equipment; crude materials, inedible, except fuels; food and live animals; mineral fuels, lubricants, and related materials; manufactured goods classified chiefly by materials; and miscellaneous manufactured articles. Leading commodities or groups of commodities registering decreases from June to July included electric and nonelectric machinery; automobile and other road motor vehicles and parts; passenger car and truck parts for assembly; aircraft and parts; soybeans; grains and cereal preparations; and coal and related products.

Among commodities or groups of commodities for which increases were reported were unmanufactured tobacco; and inorganic chemicals.

[1] *See the July 1966 issue of Report FT 900-E for seasonally adjusted figures on total domestic and foreign exports, excluding Military Assistance Program--Grant-Aid shipments. Seasonally adjusted data are not available for domestic exports only nor on a commodity basis.*

[2] *Month-to-month changes in exports and similar series often reflect primarily irregular movements. Cumulations of data over 3 or 4 month periods are desirable to identify underlying trends.*

EXPLANATION OF STATISTICS

COVERAGE: Export statistics include government as well as nongovernment shipments to foreign countries. The export statistics, therefore, include Department of Defense Military Assistance Program--Grant-Aid shipments (for which separate figures are shown in the footnotes of this report), Mutual Security Program economic assistance shipments, and shipments of agricultural commodities under P.L. 480 (The Trade Development and Assistance Act of 1954, as amended) and related laws. (The separate information which is available on exports uoder P.L. 480 and related laws may be obtained from the Economic Research Service and the Foreign Agricultural Service of the Department of Agriculture.) Shipments to U.S. armed forces and diplomatic missions abroad for their own use are excluded from the export statistics. U.S. trade with Puerto Rico and U.S. possessions is not included in this report, but the export trade of Puerto Rico with foreign countries is included as a part of the U.S. export trade. Merchandise shipped in transit through the United States between foreign countries, not entered as imports, is not included in the export statistics.

VALUATION: The valuation definition used in the export statistics is the value at the seaport, border point, or airport of exportation. It is based on the selling price (or cost if not sold) and includes inland freight, insurance, and other charges to the port of exportation. Transportation and other costs beyond the United States port of exportation are excluded. None of the values have been adjusted for changes in price level.

RELIABILITY: The statistics presented in this report are based partly on sample data and therefore are subject to sampling variation that may cause them to differ somewhat from the results which would have been obtained from processing all export documents. For the figures shown in this report the sampling variability can be ignored since the probable variability due to sampling is either less than $50,000 (the largest variation from rounding of figures) or less than a trivial percentage of the individual totals shown. In addition to the effects of sampling variation, the data in this report are subject to errors from such sources as the carry-over of data from month to month, errors in reporting or processing, the estimation of shipments valued under $100 (estimated data for such shipments are included in the over-all export total and in the totals for "Commodities and transactions not classified according to kind" and "Low-value" shipments, but excluded from other totals), and the omission of low-value parcel post shipments. Although the effect of such errors on the rounded totals in this report is probably small, the possibility of inaccuracy should be taken into account, particularly in using figures of relatively small magnitude.

Further information regarding coverage, valuation, compilation procedures and precision of export data is contained in the foreword of Reports FT 410 and FT 420. For complete statement, see foreword in Foreign Commerce and Navigation of the United States.

[1]Based on commodity classifications listed in the 1965 edition of Schedule B, Statistical Classification of Domestic and Foreign Commodities Exported from the United States, as amended. A "Supplement" showing the Schedule B commodities included in the commodity groupings and principal commodities shown in this report is available on request to the Bureau of the Census, Washington, D.C., 20233.

[2]Special Category commodities comprise a selected list of Schedule B classifications for which country of destination and district of exportation detail cannot be shown in published export reports because of security reasons. Data on exports of Special Category commodities are presented in this report under their appropriate Schedule B section and principal commodity groupings. For further information and a complete list of the Special Category commodities, see the January 1965 issue of Report FT 410.

[3]Includes ores of base metals customarily used as ferroalloying materials: manganese, chromium, tungsten titanium, molybdenum, vanadium, zirconium, etc.

[4]Includes base metals customarily used as ferroalloying materials, but not yet processed in ferroalloys. See footnote 3, above.
